Notes:

1. This rendition is adopted from *The Complete Dead Sea Scrolls in English* by Geza Vermes (ISBN 0-14-027807-9) pp. 352-356.
2. The lunar cycles realign with the solar calendar after every third year with a full moon occurring on 1 Abib; this is referenced as a "(Heavenly) sign" in 4Q319 (highlighted above).
3. The Heavenly signs repeat after every third Jubilee.
4. The priestly divisions recycle with the Heavenly signs after every sixth year; see [QumranCalendar.pdf](#) for details on the priestly divisions.
5. No lunar cycle intercalation is required. Each solar year consists of 364 days whereas the lunar cycle comprised of 354 days is ten (10) days deficient of the solar year. After three solar years, the lunar cycle is exactly thirty (30) days deficient (i.e., one solar month) and the two realign.
6. The highlighted Heavenly signs by Jubilee -- that is, the years in which a full moon occurs on 1 Abib -- are summarized below as is documented in 4Q319:
 - 17 signs for the first Jubilee; 3 signs in the Week of Release
 - 16 signs for the second Jubilee; 2 signs in the Week of Release
 - 16 signs for the third Jubilee; 2 signs in the Week of Release
 - 17 signs for the fourth Jubilee; 3 signs in the Week of Release
 - 16 signs for the fifth Jubilee; 2 signs in the Week of Release
 - 16 signs for the sixth Jubilee; 2 signs in the Week of Release
